## Contents Volume 184 (1996)

**Denitrification in the top and sub soil of grassland on peat soils**
J.G. Koops, O. Oenema, M.L. van Beusichem **1–10**

**Phosphate cycles in energy crop systems with emphasis on the availability of different phosphate fractions in the soil**
C. Andersohn **11–21**

**Soil phosphorus movement and budget after 13 years of fertilized cultivation in the Amazon basin**
M.A. Beck, P.A. Sanchez **23–31**

**Short-term effects of urea amended with the urease inhibitor N-(n-butyl) thiophosphoric triamide on perennial ryegrass**
C.J. Watson, H. Miller **33–45**

**Residual phosphorus and long-term management strategies for an Ultisol**
B.A. Linquist, P.W. Singleton, K.G. Cassman, K. Keane **47–55**

**Applications of mineral nutrients to heavily N-fertilized Scots pine trees: Effects on arginine and mineral nutrient concentrations**
A.B. Edfast, T. Näsholm, A. Aronsson, A. Ericsson **57–65**

**Measurement and modelling of photosynthetic response of pearl millet to soil phosphorus addition**
W.A. Payne, M.C. Drew, L.R. Hossner, R.J. Lascano **67–73**

**Root dynamics of *Melaleuca halmaturorum* in response to fluctuating saline groundwater**
L.J. Mensforth, G.R. Walker **75–84**

**Transpiration and root water uptake by olive trees**
F. Moreno, J.E. Fernández, B.E. Clothier, S.R. Green **85–96**

**A novel method for characterisation and quantification of plant root exudates**
A. Hodge, S.J. Grayston, B.G. Ord **97–104**

**Abscisic acid in soils: What is its function and which factors and mechanisms influence its concentration?**
W. Hartung, A. Sauter, N.C. Turner, I. Fillery, H. Heilmeier **105–110**

**Long term field study shows increased biomass production in tree legumes inoculated with *Rhizobium***
B. Lal, S. Khanna **111–116**

**Application of glucose at low concentrations to grass swards in waste-derived compost can significantly increase long-term yields**
A.A. Keeling, G.L.F. Cater, J.A. Cook, A. Wilcox **117–121**

**Soil moisture and potassium affect the performance of symbiotic nitrogen fixation in faba bean and common bean**
U.R. Sangakkara, U.A. Hartwig, J. Nösberger 123–130

**Water in aerenchyma spaces in roots. A fast diffusion path for solutes**
C.M. van der Weele, M.J. Canny, M.E. McCully 131–141

**Identification of *Agrobacterium* and *Rhizobium* species based on cellular fatty acid composition**
B.D.W. Jarvis, S. Sivakumaran, S.W. Tighe, M. Gillis 143–158

**Mycorrhizas in the Kakadu region of tropical Australia I. Propagules of mycorrhizal fungi and soil properties in natural habitats**
M.C. Brundrett, N. Ashwath, D.A. Jasper 159–171

**Mycorrhizas in the Kakadu region of tropical Australia II. Propagules of mycorrhizal fungi in disturbed habitats**
M.C. Bundrett, N. Ashwath, D.A. Jasper 173–184

*Research articles*

**Modelling the change in soil organic C and N and the mineralization of N from soil in response to applications of slurry manure**
A.P. Whitmore, J.J. Schröder 185–194

**Contribution of an arbuscular mycorrhizal fungus to the uptake of cadmium and nickel in bean and maize plants**
Y. Guo, E. George, H. Marschner 195–205

**Cultivation effects on the nature of organic matter in soils and water extracts using CP/MAS $^{13}C$ NMR spectroscopy**
A.S.N. Lessa, D.W. Anderson, B. Chatson 207–217

**Responses of soil microbiota of a late successional alpine grassland to long term $CO_2$ enrichment**
P.A. Niklaus, C. Körner 219–229

**Influence of drought on competition between selected *Rhizobium meliloti* strains and naturalized soil rhizobia in alfalfa**
M. Athar, D.A. Johnson 231–242

**Plant injury due to oxygen deficiency in the root environment of soilless culture: A review**
P. Morard, J. Silvestre 243–254

**Enhanced uptake of phosphorus by mycorrhizal sorghum plants as influenced by forms of nitrogen**
I. Ortas, P.J. Harris, D.L. Rowell 255–264

**Populations of endophytic bacteria which influence host-resistance to *Erwinia*-induced bacterial soft rot in potato tubers**
A.V. Sturz, B.G. Matheson 265–271

**Base water potential of *Picea abies* as a characteristic of the soil water status**
A. Sellin 273–280

**Soil chemical limitations to growth and development of *Veronica officinalis* L. and *Carex pilulifera* L.**
G. Tyler **281–289**

**Effects of varied soil nitrogen supply on Norway spruce (*Picea abies* [L.] Karst.) I. Shoot and root growth and nutrient uptake**
B. Seith, E. George, H. Marschner, T. Wallenda, C. Schaeffer, W. Einig, A. Wingler, R. Hampp **291–298**

**Temporal dynamics of soil spatial heterogeneity in sagebrush-wheatgrass steppe during a growing season**
R.J. Ryel, M.M. Caldwell, J.H. Manwaring **299–309**

**Growth promotion of maize and lettuce by phosphate-solubilizing *Rhizobium leguminosarum* biovar. *phaseoli***
R. Chabot, H. Antoun, M.P. Cescas **311–321**

**The sensitivity of shoot growth of corn to the least limiting water range of soils**
A. Pires da Silva, B.D. Kay **323–330**

**Effects of leaf position and nitrogen supply on the expansion of leaves of field grown sunflower (*Helianthus annuus* L.)**
N. Trápani, A.J. Hall **331–340**

**Inherent allocation patterns and potential growth rates of herbaceous climbing plants**
K.C. den Dubbelden, R.W. Verburg **341–348**

**Acknowledgement** **349–352**

**Author index** **353**

**Instructions to authors** **355–357**
